U.S. DOI, Sheila Huff, Chicago Office**Subject:** Interstate Pollution Control Site Removal Action**Polrep:** Final**II. BACKGROUND**

Site I.D. No: DC

Technical Direction Document No: N/A

Delivery Order No: N/A

Response Authority/Funding: PRP - Lead

CERCLA Identification: **ILD980498117**

NPL Status: Active and Nationally Significant

Start Date: 28 October 1991Completion Date: 09 November 1993

Weather Conditions: variable

III. INCIDENT INFORMATION:**A. SITUATION:**

This site, a former illegal TSD facility which has created extensive groundwater contamination in the southeast Rockford area as a result of extensive uncontrolled dumping of volatile organic and inorganic chemical hazardous substances including highly concentrated cyanides, has undergone a removal action in accordance with a UAO issued 8/7/91, (Docket No. V-

W-91-C-112 amended 10/8/91) instructing 17 identified PRPs to undertake this action. In accordance with the Order, the removal was to have been completed in November 1992. A status review of the site with ORC, State of Illinois EPA officials, the RPM as well as other interested persons was scheduled.

A final inspection to determine the PRP's compliance with the Order was completed on November 9, 1993.

B. ACTIONS TAKEN:

PRP has, by way of their consultant, Golder Associates, and their contractor, Heritage Remediation/Engineering, Inc., completed the prescribed removal in accordance with the Administrative Order issued for this action.

Actions taken included repair and installation of a site perimeter access control fence, removal and disposal of above and underground storage tanks (7) and their contents (200,000 gallons of contaminated oils, water and sludges), demolition of on-site structures, excavation of visibly contaminated soils from tank removal locations, backfilling of tank excavation locales, and construction of a surface impoundment cover.

C. FUTURE PLANS:

PRPs have commenced RI/FS process with State of Illinois oversight and with the assistance of oversight contractor, Hanson Engineers, Inc. of Rockford, Illinois, on September 1992.

D. KEY ISSUES:

No outstanding issues are to be addressed on this removal.

IV. COST INFORMATION:

BUDGETED

SPENT

REMAINDER

TES/TAT
EPA

This removal action was a PRP-lead action and the PRP bore the burden of the removal expense. Certain costs are subject to final definitization by U.S. EPA including specific oversight costs incurred by EPA which are reimbursible to EPA by the PRP as determined during cost recovery analysis.
